

Rahul Motvani

[✉ rahulmotvani8@gmail.com](mailto:rahulmotvani8@gmail.com)**DevOps Engineer | DevSecOps Engineer | SRE**

US, UK, Europe, Canada, Australia, Singapore, UAE & Global Remote Roles

Senior DevOps & DevSecOps Engineer with 4.5+ years of hands-on experience designing, automating, securing, and operating cloud infrastructure across AWS, Azure, and GCP. Specializing in Kubernetes, Terraform IaC, DevSecOps pipeline integration (SonarQube/Snyk), and Site Reliability Engineering (SRE).

TECHNICAL CORE COMPETENCIES

Cloud Platforms:

AWS (Amazon Web Services), Microsoft Azure, Google Cloud Platform (GCP)

Infrastructure as Code (IaC):

Terraform, Infrastructure Automation, Configuration Management

Containers & Orchestration:

Docker & Docker Compose, Kubernetes (K8s), Helm

CI/CD & Automation:

Git & GitHub Actions, Bitbucket & Bitbucket Pipelines, Pipeline & Deployment Automation

DevSecOps & Security:

Snyk, SonarQube, Wazuh SIEM & Security Scanning, Nessus & Burp Suite, Secure CI/CD & Secret Management

Observability & SRE:

Monitoring & Alerting, Logging & Tracing, Incident Response & RCA, Reliability Engineering

Networking & Security:

TCP/IP & Linux Networking, Reverse Proxy & Load Balancing, DNS, HTTP/HTTPS & Firewalls

Operating Systems & Scripting:

Linux (Ubuntu / Debian / RHEL), Bash Shell Scripting, Python Automation

Databases & Storage Services:

PostgreSQL, Redis, MySQL & MongoDB

PROFESSIONAL WORK EXPERIENCE

DevOps / DevSecOps Engineer

Dec 2025 – Present

Azilen Technologies Pvt Ltd

- Architecting multi-cloud IaC provisioning in Terraform across AWS and Azure environments.
- Integrating SonarQube and Snyk into Bitbucket Pipelines to enforce automated security Quality Gates.
- Managing Bitbucket Data Center platform upgrades and PostgreSQL major version migrations.
- Orchestrating containerized microservices on Kubernetes with resource quotas and ingress TLS rules.

DevOps & Cloud Systems Engineer

2021 – Nov 2025 (4+ Years)

Professional Experience Progression

- Engineered automated CI/CD pipelines, reducing deployment times and eliminating release failures.
- Deployed Prometheus & Grafana monitoring stacks to measure application SLOs and minimize MTTR.
- Automated Linux administration tasks via Bash and Python scripts across distributed web servers.

Networking & Security:

TCP/IP & Linux Networking, Reverse Proxy & Load Balancing, DNS, HTTP/HTTPS & Firewalls

Operating Systems & Scripting:

Linux (Ubuntu / Debian / RHEL), Bash Shell Scripting, Python Automation

Databases & Storage Services:

PostgreSQL, Redis, MySQL & MongoDB

PROFESSIONAL WORK EXPERIENCE

DevOps / DevSecOps Engineer

Dec 2025 - Present

Azilen Technologies Pvt Ltd

- Architecting multi-cloud IaC provisioning in Terraform across AWS and Azure environments.
- Integrating SonarQube and Snyk into Bitbucket Pipelines to enforce automated security Quality Gates.
- Managing Bitbucket Data Center platform upgrades and PostgreSQL major version migrations.
- Orchestrating containerized microservices on Kubernetes with resource quotas and ingress TLS rules.

DevOps & Cloud Systems Engineer

2021 - Nov 2025 (4+ Years)

Professional Experience Progression

- Engineered automated CI/CD pipelines, reducing deployment times and eliminating release failures.
- Deployed Prometheus & Grafana monitoring stacks to measure application SLOs and minimize MTTR.
- Automated Linux administration tasks via Bash and Python scripts across distributed web servers.

KEY ENGINEERING PROJECTS & CASE STUDIES

Rahul Motvani

✉ rahulmotvani8@gmail.com

DevOps Engineer | DevSecOps Engineer | SRE

📍 US, UK, Europe, Canada, Australia, Singapore, UAE & Global Remote Roles

Senior DevOps & DevSecOps Engineer with 4.5+ years of hands-on experience designing, automating, securing, and operating cloud infrastructure across AWS, Azure, and GCP. Specializing in Kubernetes, Terraform IaC, DevSecOps pipeline integration (SonarQube/Snyk), and Site Reliability Engineering (SRE).

TECHNICAL CORE COMPETENCIES

Cloud Platforms:

AWS (Amazon Web Services), Microsoft Azure, Google Cloud Platform (GCP)

Infrastructure as Code (IaC):

Terraform, Infrastructure Automation, Configuration Management

Containers & Orchestration:

Docker & Docker Compose, Kubernetes (K8s), Helm

CI/CD & Automation:

Git & GitHub Actions, Bitbucket & Bitbucket Pipelines, Pipeline & Deployment Automation

DevSecOps & Security:

Snyk, SonarQube, Wazuh SIEM & Security Scanning, Nessus & Burp Suite, Secure CI/CD & Secret Management

Observability & SRE:

Monitoring & Alerting, Logging & Tracing, Incident Response & RCA, Reliability Engineering

Networking & Security:

TCP/IP & Linux Networking, Reverse Proxy & Load Balancing, DNS, HTTP/HTTPS & Firewalls

Operating Systems & Scripting:

Linux (Ubuntu / Debian / RHEL), Bash Shell Scripting, Python Automation

Databases & Storage Services:

PostgreSQL, Redis, MySQL & MongoDB
